

WATERWORKS

Aerospace Release System

Fresh Start

Non-Hazardous Cleaner

DESCRIPTION

Fresh Start has been developed for use in the aerospace industry to clean a tool or finished part to a waterbreak-free surface without the use of solvents or other hazardous components. *Fresh Start* is effective in removing most contaminants and semi-permanent release coatings on both new and existing tools. *Fresh Start* can also be used to prepare parts for secondary bonding, painting, or other processing that usually requires a clean surface.

BENEFITS

- More cleaning power than solvents
- Visual evidence when surface is clean
- No fumes or bad solvent odors
- Non-flammable and Non-hazardous
- Ready-to-use dispenser packaging
- Does not "Flash-off" allowing more time to work
- People safe (no gloves or respirators required)
- No special storage requirements
- ENVIRONMENTALLY SAFE

TYPICAL PROPERTIES

Appearance/Odor: Green liquid/neutral odor

Carrier: Water

Flash Point (c.c.): None

USES

Fresh Start is recommended for the cleaning of composite and metal tools, equipment, and finished parts to a waterbreak-free surface.

HOW TO USE

1. Apply small amount of *Fresh Start* directly onto surface.
2. Using a moist cloth or abrasive pad, scrub surface to loosen any contaminants.
3. Work on small sections until the entire surface is scrubbed; a pneumatic buffer can be used on large parts.
4. Thoroughly rinse with water or wipe off and repeat until waterbreak-free surface is achieved.
5. Keep container closed when not in use.

Note – For best results, do not allow *Fresh Start* to dry on surface. Rinse or wipe off thoroughly while product is hydrated.

Fresh Start

Non-Hazardous Cleaner

- Gallon
- Bottle
